***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyle (EP 0801 934 A2).

Boyle discloses a tubular stent (10) having struts (250, 255), wherein the struts are welded together, apex sections (60) that point in the first direction axially overlapping the apex sections (65) that point in the second direction as is claimed (figures 1-7, column 4 lines 6-35 and column 7 lines 7-53).

3. Claims 1-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Nadal et al. (U.S. Patent 5,800,515).

Art Unit: 3738

Nadal et al. disclosed an intraluminal stent having plurality of hoops ((13a, 15a, 17a, 19a) and an apex having two strut wherein one strut (9) is longer than the second strut (7) as is claimed (figures 5, 8 and 11, column 3 lines 32-67, column 4 lines 1-67, column 5 lines 1-35 and column 6 lines 18-38).
